

Product Name: Stabilised 20g Chlorine Tablets

Product Code: SP112

Product Description

A small tablet form of chlorine sanitiser for pools and spas, that is placed in the skimmer basket or floating dispenser and slowly dissolves.

Dosing Instructions

Place tablets in the skimmer basket or floating dispenser. Never place tablets directly into the pool, as severe bleaching or staining may occur.

If using a feeder or dispenser ensure that the tablets are the same chemical (trichloroisocyanuric acid). If another material has been used before wash out the feeder thoroughly before adding tablets.

Pool

Skimmer: 1 tablet per 1000 gallons of pool water. It will take 3 to 5 days to dissolve.

Floating dispenser: Fill the dispenser and adjust collar to get correct rate of dissolution. Tablets will take 5 to 7 days to dissolve. Check chlorine levels regularly with a test kit and maintain a chlorine residual of 1 to 3 parts per million (ppm).

Once a fortnight (or once a week during the summer) boost the chlorine level with the addition of Chlorine Shock (Calcium Hypochlorite Granules).

Spa

Floating Dispenser - Place 1-3 tablets in the dispenser and adjust the collar to get correct rate of dissolution.

Tablets will take 2 to 3 days to dissolve. Check chlorine levels regularly with a test kit and maintain chlorine residual of 2 to 4 ppm.

WEIGHT:

Chemical: Trichloroisocyanuric (Symclosene) **UN Number:** 2468

Index No: 613-031-00-5 **EC Number:** 201-782-8

CAS Number: 000087-90-1

Danger

May intensify fire; Oxidizer. Harmful if swallowed.

Causes serious eye irritation. May cause respiratory irritation.

Very toxic to aquatic life with long lasting effects.

Contact with acids liberates toxic gas.
