

Product Name: Dechlorinator
Product Code: SP242

Product Description

Safely removes chlorine from the pool water should accidental over-chlorination occur.

Dosing Instructions

Carefully test the pool water to get an accurate chlorine level (see our website for more details on testing for high levels of chlorine).

Fill a clean plastic container with warm water and add the required amount of Dechlorinator to the container. Once diluted distribute evenly around the pool.

2 litres of Dechlorinator per 10,000 gallons of pool water will reduce the chlorine level by 5 parts per million (ppm).

Caution: Underdose rather than overdose.

Allow the pool water to turn over twice before re-testing. Allow the chlorine level to return to below 3ppm before re-entering the pool.

WEIGHT:

Chemical: Sodium Thiosulphate
EC Label Number: 231-867-5
CAS Number: 7772-98-7

Risk & Safety

This product is not a dangerous substance under the classification, packaging and labelling regulations. Under the current CLP regulations risk and safety phrases are not assigned to the product.

General Health and Safety Information

- Wear suitable gloves and face/eye protection.
- Never mix with other chemicals as dangerous reactions may occur.
- Add chemicals to water and not vice versa.
- Keep in a secure, cool, dry, well ventilated place.
- Keep containers closed when not in use.
- Wash hands after handling chemicals.
- Rinse container thoroughly in pool water prior to disposal or recycling.
